ABSTRACT

Enrollment data for Nebraska institutions of higher education are presented. Data were obtained from the Higher Education General Information Survey. Full- and part-time enrollment and headcount enrollment for fall 1973 through fall 1978 are compiled by type of institution, by institutional sectors, and by institution. Detailed fall headcount enrollments are given for 1975 through 1978 by student levels and classifications. While the enrollment in the fall of 1978 was higher than in the fall of 1973, full-time enrollments increased by only a little more than 9 percent. Part-time enrollments increased by almost 34 percent during this five-year period. Those students enrolled in degree-credit programs and courses but not carrying sufficient credit hours to be classified as full-time students also represent a greater proportion of the total 1978 enrollment than the total 1973 enrollment. It appears that increasing numbers of persons are taking advantage of the activities and services offered by the institutions in Nebraska, but an increasing proportion of these persons are doing so on a part-time basis. FALL HEADCOUNT ENROLLMENTS IN NEBRASKA INSTITUTIONS OF POSTSECONDARY EDUCATION

1973 Through 1978

DETAILED ENROLLMENTS FOR THE YEARS

1975 Through 1978

August, 1979

PREFACE

The headcount enrollment data reported in this report were reported by the Nebraska institutions of postsecondary education on the Higher Education General Information Survey (HEGIS). The HEGIS enrollment report is part of a series of reports institutions file with the National Center for Education Statistics of the U.S. Department of Health, Education, and Welfare each fall. The Nebraska Coordinating Commission for Postsecondary Education coordinates the distribution of the HEGIS reporting forms to the institutions, the collection and return of completed reports for the National Center for Education Statistics (NCES).

The bulk of these data (enrollments for Fall 1975 through Fall 1978), were taken from the following HEGIS reports.

Fall 1978: "Fall Enrollment and Compliance Report of Institutions of Higher Education - 1978" (O.E. Form 2300-2.3), summary sheet, columns 13 and 14.

Fall 1977: "Fall Enrollment in Institutions of Higher Education - 1977" (NCES Form 2300-2.3), columns 13 and 14.

Fall 1976: "Fall Enrollment and Compliance Report of Institutions of Higher Education - 1976" (O.E. Form 2300-2.3), summary sheet, columns 13 and 14.

Fall 1975: "Opening Fall Enrollment in Higher Education - 1975" (O.E. Form 2300-2.3), appropriate lines and columns; some summations were made.

The data for Fall 1975 through Fall 1978 were sent to each Nebraska institution of postsecondary education on March 13, 1979 for verification. The data reporting herein reflect changes made by the institutions as a result of the process of verification. Those data reported, for purposes of showing enrollment changes over the last five (5) years, for Fall 1973 and Fall 1974 were taken from the Commission's report entitled: Enrollment Trends in Postsecondary Education for the State if Nebraska, 1967-1978, dated June 2, 1978.

The Commission wishes to acknowledge with appreciation the cooperation and time the institutions devoted to reviewing and verifying the data contained in this report.

I. Introduction

Fall headcount enrollment reporting is only one of several types of enrollment that might be used with respect to an institution, several institutions, at the state or national level. Depending upon the question being addressed, the following enrollment counts may be appropriate: fall headcount, unduplicated headcount over a fiscal year, full-time equivalency, etc. Each type of enrollment count tells the reviewer of the statistics something different as usually, in each instance, something different is being examined.

Fall headcount enrollment is normally used as a barameter of trends among and between institutions. The fall period is usually the time in which traditional collegiate institutions experience their peak enrollment period. Thus, by comparing one fall enrollment period with another, the reviewer can get a general understanding of whether the enrollments are increasing and the postsecondary educational enterprise is expanding, or whether enrollments are decreasing and the enterprise is contracting. Changes in student enrollment patterns also may be generally inferred from the fall headcount statistic.

The following three (3) Figures and related Tables show that the postsecondary educational enterprise in Nebraska is generally expanding and is growing in both the public and independent sectors of postsecondary education. While the enrollment in the Fall of 1978 was some 17% higher than in the Fall of 1973 (Table No. 2), full-time enrollments only increased a little more than 9% (Table No.3), while part-time enrollments increased by almost 34% (Table No. 4), over this five-year period. Those students enrolled in degree-credit programs and courses but not carrying sufficient credit hours to be classified as a full-time student, also represent a greater proportion of the total 1978 enrollment than the total 1973 enrollment (increasing from some 31% of the total enrollment in 1973 to some 36% by the Fall of 1978).

Thus, it appears that increasing numbers of persons are taking advantage of the activities and services offered by the institutions in Nebraska, but an increasing proportion of these persons are doing so on a part-time basis.

ERRATA NOTE: On Page 3, Figure No. 1, the total part-time enrollment for 1973 should be 22,007 rather than 20,007 as shown on Figure No. 1.
